## DUNGEONS & DRAGONS WARRIORS OF THE ETERNAL SUN

1. If you find yourself short of cash, stay on the Molten Rock next to the entrance to Beyond The Flames and wander around. You'll regularly run into a Red Dragon which, when defeated, yields about 2,000 gold pieces a time. (You'll need the Rings of Fire Resistance from the Azcan Temple to do this.)
2. Character selection - Choose a Cleric, Thief, a Mage/Elf character and one other. Clerics are essential for healing characters, thieves for Disarm/Spotting Traps, and Magic Users for serious firepower.
3. You can find the Cloudhill, Ice Storm and Lightning Bolt spells in Beyond The Flames. Kill the Red Dragon near the start, head West into the corridor, and then go North, East and South into the room with the Ogre/Giant in it. Kill him and you'll find the spells hidden in a small room on the South wall of the Ogre room.
4. In the Azcan Temple you can avoid nearly all the traps by using secret doors. Map it carefully though.
5. When the city folk go mad, don't visit the Duke as he banishes you from the city. This will mean that dead characters cannot be resurrected.

## LEMMINGS

### General Tips:

The most important thing to remember about Lemmings is, **DON'T PANIC!** If you feel that everything is moving too quickly, you can slow down the rate of Lemmings, and that should give you a bit more time to think.

The first couple of times you play a level you're not too sure of, turn the second Lemming into a blocker - to hold back the rest of them, and just concentrate on the first Lemming that came out. This way, you don't have to panic about worrying about 30 (ish) Lemmings all at the same time.

Very often any problem on a level is more obvious than it looks. Look at the amounts of the various characters that you've been allocated, and work it out from there.

Remember: You can select the characters (builder, digger etc.) while the game is in pause mode. This will also help the more nervous players out there.

## SONIC THE HEDGEHOG 2

A good point to remember is that if you collect any of the emeralds and die on that same Act, you'll have to collect that Emerald again.

If - for some strange reason - you still can't complete the game, remember that you get a continue for every Emerald you manage to collect. Technically, this means that at the end of the game you could have up to six continues!

### **Emerald One:**

The Emerald is located in the top right-hand corner of Act Two. To get it, go across the top of the level, ignoring the carts. If you spin down the ramps instead, you'll get up much more speed (which is needed to clear the gaps!)

### **Emerald Two:**

About halfway through the level and hidden up in the clouds, you'll find the Emerald. Getting it though isn't that easy. To the left of the cloud platform underneath the Emerald are three small 'spring' clouds. These are the solution to getting the Emerald. Practice is the key to perfection here, and once you locate the springs, you shouldn't have any trouble getting it.

### **Emerald Three:**

This is probably the easiest Emerald to get. As you enter the second maze, press left. If you keep pressing left as you're speeding through the tunnels, you'll eventually end up in a small room with the Emerald in it.

# MASTER SYSTEM

## SONIC THE HEDGEHOG 2

### ***Emerald Four:***

This is to be found about three quarters of the way through the act. After you've got the second extra life, you'll come to a slope. Bomb down this (without going into a spin) and drop off the end. You'll then start bouncing across a extensive area of spikes. Timing is needed here, but you'll find that you'll naturally land on the springs, but just remember to take care and think about your jumps.

The last spring will send you up to the top of a high tower where you'll find the Emerald.

### ***Emerald Five:***

This is to be found in a secret section of the act, near the start. Go across the conveyor belts and up the ramp. At the top, jump to the left and you should find yourself in a secret room. Go along to the left, up the CDs and along to the right and you'll find the Emerald. Go back the way you came to get back to the main part of the act - and another extra life.

### ***Emerald Six:***

To get the last Emerald on this act, you have to defeat the Silver Sonic on act three.

In the first 30 seconds of level one, the hamburgers that you shoot are worth a whopping 1,000 gold pieces. After you've collected at least 2,000 points, the shop will appear. So collect as many of those hamburgers in the first 30 seconds as you possibly can, and then leg it to the shop.

## LEMMINGS

### General Tips:

The most important thing to remember about Lemmings is, **DON'T PANIC!** If you feel that everything is moving too quickly, you can slow down the rate of Lemmings, and that should give you a bit more time to think.

The first couple of times you play a level you're not too sure of, turn the second Lemming into a blocker - to hold back the rest of them, and just concentrate on the first Lemming that came out. This way, you don't have to panic about worrying about 30 (ish) Lemmings all at the same time.

Very often any problem on a level is more obvious than it looks. Look at the amounts of the various characters that you've been allocated, and work it out from there.

Remember: You can select the characters (builder, digger etc.) while the game is in pause mode. This will also help the more nervous players out there.

A red bag will take it's place. Get that and you'll be transported to a bonus stage. To get back, just collect the red bag again.

The first Emerald is located in the top right-hand corner of Act Two. To get it, go across the top of the level, ignoring the carts. If you spin down the ramps instead, you'll get up much more speed (which is needed to clear the gaps!)

### Emerald Two:

About halfway through the level and hidden up in the clouds, you'll find the Emerald. Getting it though isn't that easy. ## SONIC THE HEDGEHOG 2

### **Emerald Four:**

This is to be found about three quarters of the way through the act. After you've got the second extra life, you'll come to a slope. Bomb down this (without going into a spin) and drop off the end. You'll then start bouncing across a extensive area of spikes. Timing is needed here, but you'll find that you'll naturally land on the springs, but just remember to take care and think about your jumps.

The last spring will send you up to the top of a high tower where you'll find the Emerald.

### **Emerald Five:**

This is to be found in a secret section of the act, near the start. Go across the conveyor belts and up the ramp. At the top, jump to the left and you should find yourself in a secret room. Go along to the left, up the CDs and along to the right and you'll find the Emerald. Go back the way you came to get back to the main part of the act - and another extra life.

### **Emerald Six:**

To get the last Emerald on this act, you have to defeat the Silver Sonic on act three.

Hold down Button Two WHILE turning on the Game Gear. For a hard mode, do the same, but hold down Button One instead.

For a secret game of Pac-Man, with Spidey as the main man, and Venom as the ghosts, start by playing a game in Nightmare mode. Now when you're on Electro's level, and you've just collected the key, drop down to the left side of the screen. You should now see a small Game Gear on your way down. Land on it and go back to Peter's room. You'll now have an option to start the hidden game.

## TERMINATOR

### Level Select:

For a level select for Terminator, go to the main TERMINATOR screen, hold down Button 2 and press Button 1. The screen will turn black for a few seconds. While the screen is black, do the following on the joypad: Left, Left, Up, Up, Right, Right, Down, Down.

Two zeros should appear on-screen. You can now select the level of your dreams by pressing right and left on the joypad.
